PP	Project Promoter
Regulations	Regulation on the implementation of the Norwegian Financial Mechanism 2014-2021 and Regulation on the implementation of the European Economic Area (EEA) Financial Mechanism 2014-2021
VAT	value added tax

1 Purpose of this document

The document presents reporting on the progress of projects implemented under the programme *Climate Change Mitigation and Adaptation* and the programme *Education, Scholarships, Apprenticeship and Youth Entrepreneurship* (hereinafter document). The document identifies the reporting procedure by presenting in detail the steps of submitting reports into the electronic Monitoring System (hereinafter eMS), modifications of the project and reporting by Donor Project Partner who is subject to certain specific provisions.

The document is issued by the Ministry of Cohesion and Regional Development (hereinafter MCRD) acting as the Programme Operator of the programme *Climate Change Mitigation and Adaptation* and the programme *Education, Scholarships, Apprenticeship and Youth Entrepreneurship* (hereinafter Programme Operator).

The document is binding for all Project Promoters and project partners (hereinafter beneficiaries) in relation to the projects selected under the call for proposals or pre-defined projects under the abovementioned programmes. Section 3.1.7 of this document shall apply to project partners registered in Donor States. The Project Promoter shall be responsible for transmission of information.

If necessary, the document shall be subject to revision during project implementation; for this reason, the beneficiaries must always use the last valid version of the document published on the website dedicated to the implementation of the Financial Mechanisms in the Republic of Slovenia, namely www.norwaygrants.si and www.eeagrants.si (hereinafter dedicated website), under Documents – Guidelines.

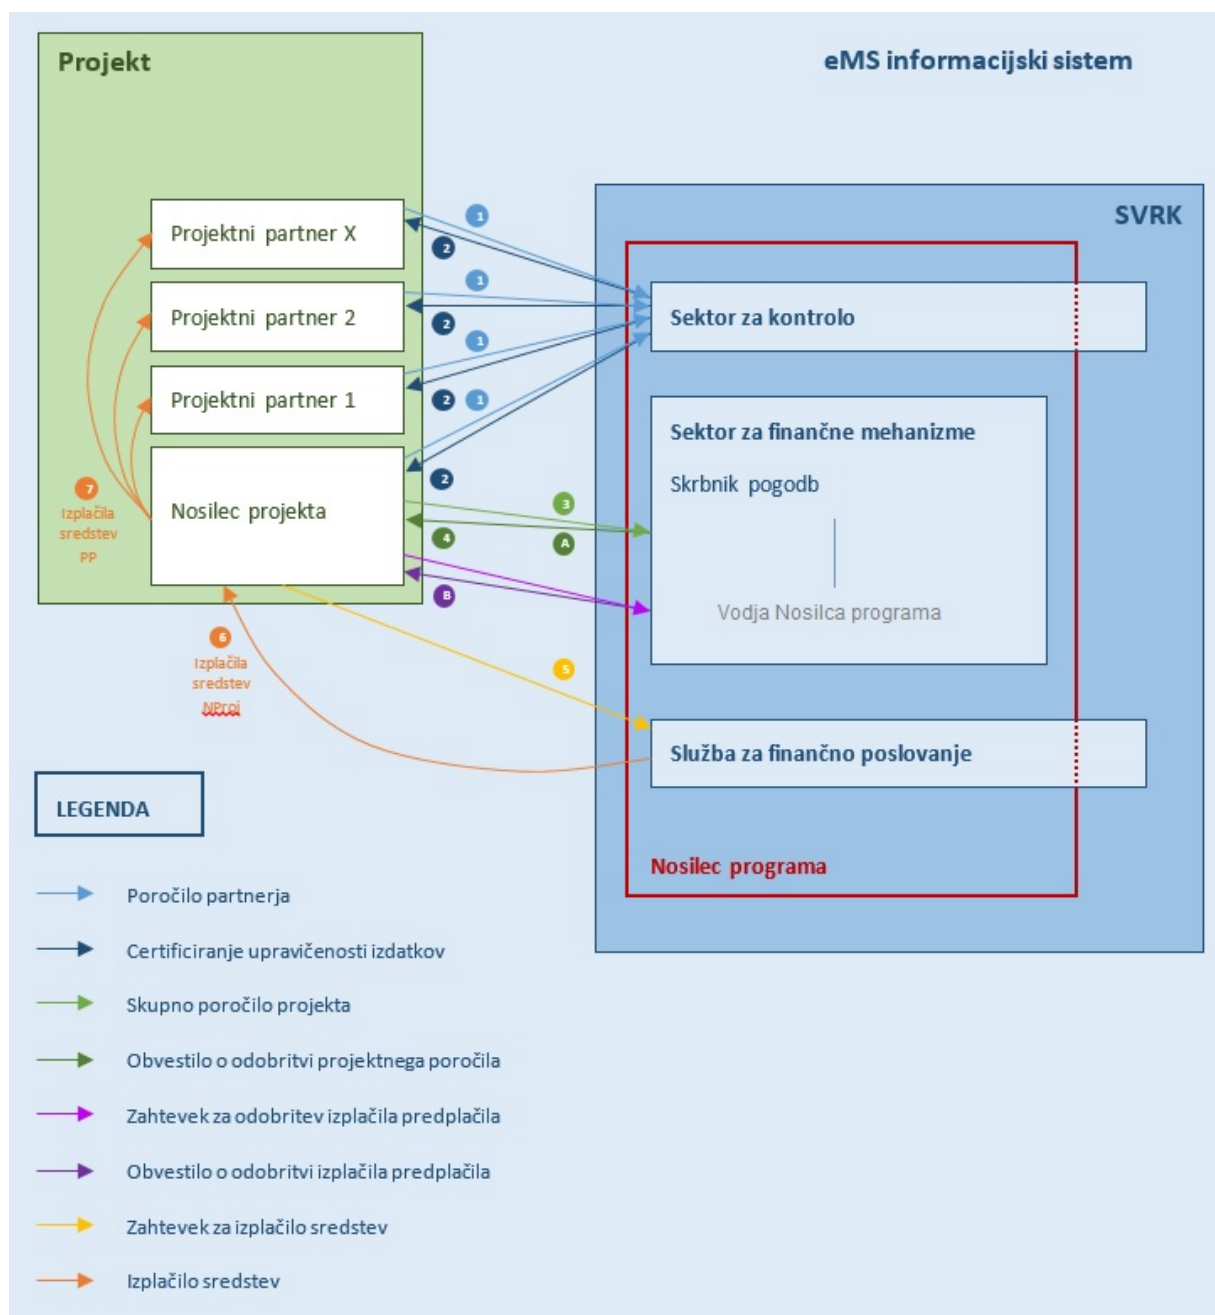

Wherever used in this document, a pronoun in the masculine gender shall be considered as including the feminine gender in line with the principles of gender-inclusive language.

2 Reporting procedure

Reporting on project progress is done in several stages as presented in the sections below.

At the end of an individual reporting period, each project partner (including the Project Promoter in the role of the project partner) prepares a partner report in the eMS and submits it to the control unit (hereinafter CU). After receiving all certificates for all project partner reports, the Project Promoter prepares a joint project report and submits it to the Programme Operator.

Figure 1: Reporting procedure

Description of the reporting procedure presented in Figure 1:

Step 1: The Project Promoter and all Project Partners involved in the implementation of a particular project report on the implementation of projects by means of partner reports which are submitted to the Programme Operator's Control Unit via eMS. The Project Promoter and all Project Partners report on project implementation and associated incurred expenditures separately.

Step 2: The Control Unit performs verification of reported expenditures and certifies the amounts of eligible expenditures. On the basis of performed verifications and certification of the amounts of eligible expenditures, the Control Unit issues respective certificates and send them to the Project Promoter and Project Partners involved in the implementation of a particular project.

Step 3: *On the basis of project implementation reports and certificates issued by the Control Unit, the Project Promoter of a particular project prepares a joint project report and submits it to the Programme Operator via eMS. The contract manager at the Programme Operator verifies the joint project report and sends it via eMS to the Head of Programme Operator for approval.*

Step 4A: *The Head of Programme Operator issues a notification on the approval of the joint project report.*

Step 4B (refers to advance payment): *The Project Promoters sends the claim for advance payment to the Programme Operator. The Programme Operator approves the claim for advance payment.*

Step 5: *The Project Promoter forwards to the MCRD financial service a request for payment in the form of an e-invoice.*

Step 6: *The MCRD financial service makes payment of certified total eligible costs to the Project Promoter.*

Step 7: *The Project Promoter makes payments of respective amounts to Project Partners.*

2.1 Partner reports

Following the issuance of a project selection decision (applies to projects selected in a call for proposals) or the notification of the National Focal Point to Donor States that the Programme Operator has positively appraised a pre-defined project (applies to pre-defined projects), project implementation and reporting come next. After the end of each reporting period identified in the approved application form each project partner (including Project Promoter in the role of project partner) shall prepare within 30 days a partner report in the eMS and submit it electronically to the control unit for verification purposes. This shall not apply to Donor Project Partners to whom the reporting method described in section 3.1.7 applies.

Partner report shall be prepared in Slovene and shall contain a substantive and financial segment. Partner report shall give information on the implemented activities and deliverables of the relevant period and a financial report with annexes serving as proof of expenditure as set out in Part 4 of the Guide for Beneficiaries. Partner report shall include expenses incurred and paid by the end of the current reporting period and, exceptionally, in previous reporting periods under the condition of obtaining a prior approval by the contract manager. Expenditure not paid by the end of the reporting period is included in the next partner report even if the related activities are carried out in the current period¹.

If no expenditure has been incurred during the reporting period, the project partner shall prepare a zero partner report and shall include the expenditure in the financial segment of the partner report as 0 (zero) expenditure. The zero partner report shall provide information on the implemented activities and the reasons why no expenditure incurred. The project partner reports on the content of the implemented activities again in the next partner report and includes also a financial segment.

¹ Specific cases regarding payment of expenditure for the final reporting period are described in more detail in Part 4 of the Guide for Beneficiaries.

Expenditure verification shall be performed by an independent control unit. The verification covers administrative verification of all accounting documents or documents of equivalent probative value and the supporting documentation included in the partner report. After verification of the attached documents and verification of compliance of the declared expenditure with the approved application form and the programme and relevant national eligibility rules, the control unit issues a standardised notification of eligible expenditure (hereinafter CU certificate), which serves as the basis for reimbursement.

The control unit also performs on-the-spot verifications of projects checking the progress made in terms of project implementation as well as the compliance of project implementation with the Project Contract. The on-the-spot verifications of projects are carried out on a sample basis. Projects are selected for on-the-spot verifications on the basis of a risk analysis, which identifies reasons for the high level of technical, management, financial, legal and other risks of the projects. If necessary, the contract manager and other Programme Operator and/or National Focal Point representatives are present at on-the-spot verifications.

On-the-spot verifications shall be carried out at the premises of the Project Promoter and/or project partner.

On-the-spot verifications shall be carried out unannounced or announced by a prior notice.

2.2 Joint project report

Project Promoter shall submit to Programme Operator a joint project report serving as the basis for project implementation monitoring and reimbursement. The joint project report is prepared in Slovene and serves as the basic tool for reporting and monitoring project implementation progress and the related expenditures in accordance with the plans of the approved application form. The report also provides information on the delivered outcomes and new findings. The information provided in the reports shall be as clear and consistent as possible. The data used for preparing the joint project report is collected and aggregated by the Project Promoter for each reporting period on the basis of the information provided by each project partner in their partner report.

The Project Promoter shall claim reimbursement only upon submission of proof of progress made in attaining the set outputs and objectives of the project. This is explained in more detail in the Project Contract, which stipulates that the Project Promoter requests payments by submitting a joint project report, annexed with the CU certificates.

The Project Promoter combines partner reports in a joint project report, which consists of a substantive segment on the activities, and a financial segment. The Project Promoter submits a joint project report together with the CU certificates to the contract manager via the eMS system.

The substantive segment of the joint project report shall cover the actual progress of the project towards attaining the objectives and outcomes set out in the approved application form. The substantive segment consists of:

- the "Report": main deliverables, specific project objectives delivered, project main outputs delivered, target groups reached, problems and solutions identified, and horizontal principles,

- the “Work packages”: a description of the activities and deliverables for each work package and a description of the participation of each project partner.

The financial segment of the joint project report covers the certified expenditure of all project partners during the reporting period.

The Project Promoter also obtains proof from all project partners (scanned bank certificate) that they have received payment for the previous period. The said proof is uploaded to the eMS in the section “Attachments”.

After the approval of the joint project report, the Programme Operator shall issue a notification on the approval of the joint project report. The Project Promoter then forwards to the MCRD financial service via UJPnet a request for payment to the Project Promoter in the form of an e-invoice.

Each project follows its own reporting cycle in line with the application form or its latest approved version. The joint project report is submitted to the Programme Operator within 30 days following the receipt of all CU certificates relating to the relevant reporting period. The Project Promoter is responsible for submitting the joint project report within the relevant reporting deadline.

3 Reporting in the electronic Monitoring System (eMS)

Figure 2: Registration and login in the eMS

Prijava/Login

Disclaimer

To register as a user in the eMS, follow the instructions on registering in the eMS in Part 3 of the Guide for Beneficiaries.

Log in to the eMS and click on the project.

3.1 Partner report

Once the Project Contract has been concluded, the reporting section is available for completion. A project partner who is not the Project Promoter has access to the eMS reporting section after the Project Promoter grants them the rights to log in to the eMS.

The user does not need special rights to create and/or submit a partner report. Access to the partner report is granted by the Project Promoter by assigning users as partners in the section “Additional Information” → “User Assignment”.

The Project Promoter accesses the section “User Assignment” within the section “Additional Information” and assigns users. One project partner can have multiple users, all of whom have equal access to the partner report.

Figure 3: User assignment

If the user has multiple roles in the eMS (e.g. Project Promoter and project partner), select the appropriate role from the drop-down menu at the top of the “Select Role” interface (circled in red in Figure 4). To prepare the partner report, select the role “Pp” (project partner).

Project Promoter creates own partner report as “Pp” (project partner) and not as “NProj” (Project Promoter). The role “NProj” (Project Promoter) is used only for joint project reports.

Figure 4: Selecting a role and creating a new partner report

The eMS shall then redirect the partner report matching a specific reporting period. The partner report consists of various sections (“Partner Report”, “List of Expenditure”, “Contribution and Forecast”, “Attachments” and “Personal Data Attachments”) to be completed. The fields in the section “Partner Report” depend on the project application form.

3.1.1 Section “Partner Report”

Figure 5: Section “Partner Report”

The screenshot shows the 'Partner Report' section of the application form. The main heading is 'Poročilo partnerja/Partner Report' with a sub-heading 'Obdobje/Period 1 - 10.09.2019 - 31.03.2020'. The 'Datum začetka/Start Date' is 10.09.2019 and 'Datum konca/End Date' is 31.03.2020. The section 'Povzetek dela partnerjev/Summary Of Partners Work' contains a text editor with a toolbar and a character count of 0. Below this is the 'Doseženi glavni neposredni učinki projekta/Project Main Outputs Delivered' section, which includes a table for 'Neposredni učinek (output)/Output' with columns for Name, Description, and Attachments. The 'Dodatek ciljne skupine/Target Groups Reached' section is also visible. Three red circles highlight the 'Poročilo partnerja/Partner Report' menu item, the 'Dodaj neposredni učinek (output)/Add Output' button, and the 'Dodaj Ciljne skupine/Add Targetgroup' button.

The section “Partner Report” contains general descriptions by work package for the relevant reporting period.

In the section “Partner Report”, fill in the following fields:

- summary of project partner’s work in the relevant reporting period,
- project main outputs delivered,
- target groups reached.

In the section “Summary of Partners Work”, the project partner reports on all activities carried out in the relevant reporting period. If relevant, the project partner also reports on de minimis aid, namely the project partner reports which activities have received de minimis aid and the value (amount) of the de minimis contribution.

By clicking on “Add main output” in the section “Project Main Outputs Delivered” a new window opens (as demonstrated in Figure 6), namely the drop-down menu containing all the outputs listed in the application form, for the user to select all the relevant main outputs. The field “Description” is used to describe the main project outputs delivered. The documents for each main output delivered are uploaded in the field “Output Evidence”.

By clicking on “Add Target Group” a new window opens (as demonstrated in Figure 6), namely the drop-down menu containing all the target groups listed in the application form, for the user to select the relevant target group.

For certain indicators the target values should be broken down (e.g. by gender, age) in the reporting stage. Annex 1 to Part 1.a (programme *Climate Change Mitigation and Adaptation*) and Part 1.b (programme *Education, Scholarships, Apprenticeship and Youth Entrepreneurship*) of the Guide for Beneficiaries identifies the indicators for which the target values should be broken down.

“Reporting Per Work Package” (Figure 7) is part of the partner’s report that presents the progress of the project at the level of work packages and activities. The list of work packages depends on the work packages in the approved application form. The description of the progress by work package shall describe the contribution to the realisation of the work packages, as well as any problems regarding implementation and the measures taken to tackle the problems.

Figure 7: Reporting per work package

⊕ Dodaj dosežke/Add Deliverable

By clicking on the tab “Add Deliverables” a new field opens to provide a description of the beneficiary’s contribution to the implementation of each activity and deliverable. For the fields with no contribution to the work package or activity in the relevant reporting period the »-« is entered. By clicking on “Deliverable Evidence” the user uploads the evidence for each deliverable.

**Remember to SAVE the data entered in the partner report.
Click “SAVE REPORT” after each reporting step.**

After filling out and saving the data enter in the section “Partner Report” the user then moves on to fill out the section “List of Expenditure”.

3.1.2 Section “List of Expenditure”

Figure 9: “List of Expenditure”

The screenshot shows a navigation menu with four items: 'Poročilo partnerja/Partner Report', 'Seznam računov/List Of Expenditure' (highlighted with a red circle), 'Prispevek in napoved/Contribution And Forecast', and 'Priloge/Attachments'. Below the menu is the 'Seznam računov/List Of Expenditure' interface. It features a search bar with '0 - 0 Od/Of 0' and a page number '25'. The interface includes several input fields: 'Možnosti/Options', 'Številka poročila/Report Number', 'Id /Item Id', 'Stroškovna kategorija/Budget Line', and 'DS/Wp'. Below these fields, it displays 'Ni ujemanja/No Match Found'. At the bottom, there are buttons for 'Izvoz/Export', 'Shrani stolpce/Save Columns', and 'Stolpci/Columns'. A red circle highlights a button labeled '+ Dodaj dejanski strošek/Add Real Cost'.

Financial reporting is done in the section “List of Expenditure” where individual expenditure is reported by clicking on “Add Real Cost”. A pop-up window appears (Figure 10) where the system asks for basic information about each expenditure. Individual expenditure shall be identified with one budget line and one work package. For each expenditure, the relevant documentation defined in Part 4 of the Guide for Beneficiaries shall be uploaded.

Figure 10: Adding new expenditure

Spremeni izdatke/Edit Expenditure
Poročilo partnerja/Partner Report 1 P1 Obdobje poročanja/Period 1 Seznam računov/List of Expenditures

The screenshot shows the 'Adding new expenditure' form. It is divided into two main sections. The left section contains various input fields: 'Stroškovna kategorija/Budgetline', 'Delovni sklop/Workpackage', 'Interna referenčna številka/Internal Reference Number', 'Številka računa/Invoice Number', 'Datum računa/Invoice Date', 'Datum plačila/Date Of Payment', 'Valuta/Currency' (set to EUR - Euro), 'Menjalno razmerje/Conversion rate' (set to 1), 'Skupna vrednost izdatka v izvorni valuti/Total Value Of Item In Original Currency', 'DDV/Vat', 'Zahtevani znesek v izvorni valuti/Declared Amount In The Original Currency', and 'Zahtevani znesek v EUR/Declared amount in Eur'. The right section contains three text input fields: 'Opis1/Description1', 'Opis2/Description2', and 'Partnerjev komentar/Partner Comment'. A red circle highlights the checkbox 'Izdatki izven programskega območja (izven SLO in drugih držav)/ (Expenditure Outside (The Union Part Of) The Programme Area?'. Three red arrows point to the 'Zahtevani znesek' fields. At the bottom, there is a button labeled '+ Nalaganje/Upload'.

The beneficiary fills out all the relevant fields:

- budget line,
- work package,
- internal reference number,
- invoice number,
- invoice date,
- date of payment,
- currency,
- total value of item in original currency,
- VAT,
- declared amount in EUR.

Amounts entered into eMS in currency other than the euro (EUR) shall be automatically converted into euro using the valid exchange rate of the European Commission².

The system recalculates the amounts several times; for the first time when the expenditure is entered and then each time it is changed before the report is submitted. The value is updated by clicking on “Check Saved Report” and again when submitting the partner report to the control unit. The amount does not change if the report is returned to the project partner and then resubmitted; the applicable exchange rate is the valid exchange rate of the first submission of the partner report.

The field “Expenditure outside the Eligible Area” is ticked for the expenditure incurred outside the eligible area. The field “Purchase of Land” is ticked when the application form indicates purchase of real estate (including renovation) and/or land (Figure 10).

There are three text entry fields in this section to be completed according to the budget line:

Staff costs

Description 1: the name of the employee, the number of the employment contract or other relevant document,

Description 2: indication of the relevant type of contract or proof of employment:

- i. full-time assignment to the project or
- ii. part-time assignment to the project with a fixed percentage of time per month on the project.

Partner comment: description of the implemented activities.

Travel and accommodation costs

Description 1: lump sum;

Description 2: proof of employment of persons, sent on a business trip, by the institution claiming reimbursement of travel and accommodation costs as a lump sum (upload the relevant document) and evidence of the activity performed, e.g. attendance list, report, presentation, photos, etc. (upload evidence).

Partner comment: description of the role of the employee and the aim of travel.

² Valid exchange rate of the European Commission: https://ec.europa.eu/info/funding-tenders/how-eu-funding-works/information-contractors-and-beneficiaries/exchange-rate-infoeuro_en

External expertise and services costs: / Equipment expenditure: / Infrastructure and construction expenditure (cost of consumables and supplies)

Description 1: name of the contractor,

Description 2: indication of existence of partial invoices,

Partner comment: description of the purpose of the expenditure.

Net revenue

Description 1: description of the activities which generated net revenue.

Filling in the List of expenditure

By clicking on “Upload”, the relevant annexes are uploaded in accordance with Part 4 of the Guide for Beneficiaries.

This page automatically creates a list of invoices visible by scrolling through the page (table). To add expenditure to the List of expenditure click on “Add Real Cost” at the bottom of the page.³

If a flat rate method for office and administrative costs (indirect cost in projects / overheads) is approved in the application form, the system automatically calculates the amount of the flat rate cost on the basis of the corresponding entries in the list of invoices under cost category Staff costs. No invoices are added to the budget line for which the flat rate applies. The amount claimed on a flat rate basis cannot be changed.

If a lump sum for travel and accommodation costs is approved in the application form, the total lump sum (EUR 2,000.00 or 7,000.00) is reported in the List of Expenditures when all the activities within the relevant work package have been fully completed.

The whole process is repeated by clicking on “Add Real Cost” until all costs from the relevant reporting period have been entered.

Remember to SAVE the entry by clicking on “Save columns”.

When claiming incurred expenditure eligibility for VAT reimbursement should be taken into account (total, partial or no reimbursement).

3.1.3 Section “Contribution And Forecast”

After entering all relevant substantive and financial data into the system, the estimated expenditures in the next reporting period, a description of potential in-kind contribution in the current period and the partner's own co-financing in the current period are entered in the “Contribution and Forecast” section.

³ Also valid for reporting of indirect office and administrative costs in accordance with point a) of the first paragraph of Article 8.5 of the Donor States regulations (please refer to Guide for beneficiaries, Part 4). The cost-sharing formula shall be defined by the beneficiary. The cost-sharing formula is defined in the first reporting period if it had not been defined already in the application. The cost-sharing formula is described under Description 1 and it must not be changed during project implementation.

In the first part of this section “Report Forecast” (Figure 11a) the amount of estimated expenditure for the next reporting period is indicated. The field “Description” describes the difference between the planned and actual financial value, if relevant.

The system calculates the total in-kind contribution that has been marked in the check box when entering documents in the section “List of invoices”. In the section “In-kind contribution” the project partner also describes the in-kind contribution in the “Explanation” (Figure 11a).

In the last section “Follow-up of Partner Contribution”, the system calculates and displays the target value of the partner’s contribution (circled in Figure 11b) outside the table, and in the table the amounts of funding from various sources in previous reporting periods and the current reporting period. The amount of the calculated target value of the partner’s contribution is entered in the corresponding financial contribution (usually the partner’s own co-financing) in the column “Current Report” (marked input field in the marked column in Figure 11b). If the column is not visible, please move the table slider to the right until the column appears.

Remember to **SAVE** the entry.

3.1.4 Section “Attachments”

Annexes to the partner report are uploaded by clicking on “Upload”. The document upload pop-up window appears showing a list of all attachments uploaded in this section, including information on who uploaded the document and when. The maximum size of one file is 6 MB. The electronic copy should be of good quality; all important information should be visible and legible.

3.1.5 Section “Attachments of Personal Data”

The section is used to upload additional attachments of personal nature. They are visible only to the beneficiaries, the control unit and the contract manager. Click “Upload” to upload the document. The document upload pop-up window appears showing a list of all attachments uploaded in this section, including information on who uploaded the document and when. The electronic copy should be of good quality; all important information should be visible and legible.

3.1.6 Submitting the partner report

After filling in all the fields, the partner report is checked by clicking on “Check Saved Report” (Figure 12). If the report is not filled in correctly, a warning about missing or incomplete fields appears, but be aware: the system does not point out possible deficient content or incorrect numerical entries, but only technical irregularities. Proper completion of the report is thus still entirely the responsibility of the project partner. When the report is complete, a new “Submit Report” button appears (Figure 13). The report is submitted by clicking on this button.

Figure 13: Checking the saved report

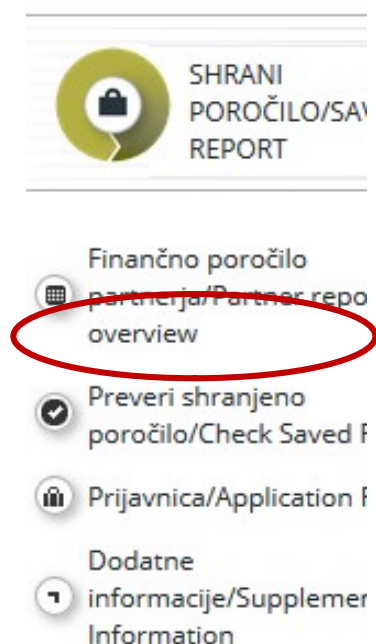

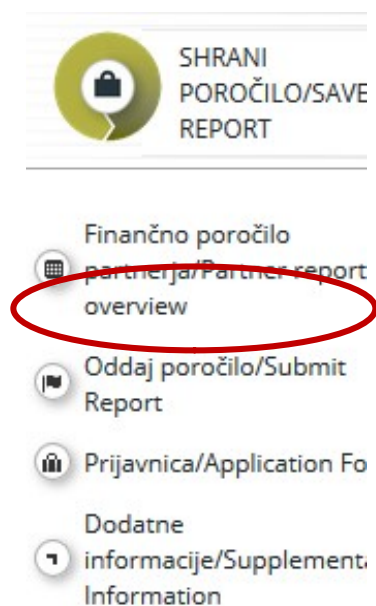

Figure 14: Submitting the report

The submitted report is locked so the project partner can no longer make changes to the report. After submission, the partner report is forwarded to the control unit. The project partner can monitor the status of the report in the table “Partner Reports”.

A new partner report can be created after the previous partner report has been submitted. The project partner cannot create more than one partner report at the same time.

3.1.7 Reporting by Donor Project Partner

Reporting by Donor Project Partner and verification and certification of eligibility of expenditure incurred by Donor Project Partner differ from the system of reporting and certification of expenditure incurred by the Slovenian beneficiary.

The form "Report of the Donor Project Partner" (hereinafter: form) consists of two parts: substantive and financial part. The form shall be made available on the website dedicated to the implementation of the Financial Mechanisms in the Republic of Slovenia (annex to Part 5 of the Guide for Beneficiaries).

Reporting on the implemented activities – substantive part of the report

As part of the substantive part of the form, the Donor Project Partner provides the Project Promoter with information on all implemented activities, achievements and possible deviations from the planned in the application form for the relevant reporting period. If necessary, the Donor Project Partner also adds attachments and submits them and the substantive part of the form to the Project Promoter by the deadline specified in the partnership agreement.

Reporting of expenditure incurred – financial part of the report

Control and certification of the eligibility of expenditure of the Donor Project Partner takes place separately from the control and certification of the eligibility of expenditure of Slovenian beneficiaries.

The Donor Project Partner prepares and submits the financial part of the form and all necessary evidence of expenditure for control to an independent Donor State auditor qualified to carry out statutory audits of accounting documents or a competent and independent Donor State civil servant recognised by the relevant national authorities as having a budget and financial control capacity over the entity incurring the costs and who has not been involved in the preparation of the financial statements (hereinafter: controller) in the own country. The controller verifies and certifies claimed costs.

The Donor Project Partner forwards the financial part of the form, approved and signed by the controller, to the Project Promoter by the deadline specified in the partnership agreement.

Creating a Partner Report for a Donor Project Partner in the eMS

Creating a partner report and entering content from both parts of the form into the eMS is a Project Promoter's responsibility.

The Project Promoter creates a partner report in the eMS on behalf of the Donor Project Partner. To this end, the Project Promoter must be assigned as a user for this project partner (see section 3.1 for more information).

The Project Promoter shall insert the information from the substantive part of the form and upload all attachments in the Partner Report in the eMS in the appropriate sections ("Partner report", "Contribution and Forecast", "Attachments"). The information shall be entered *in the Slovenian language*. Substantive part of the form IS NOT a mandatory annex to the Partner Report in the eMS.

The Project Promoter shall insert the information from Point 6 of the financial part of the form in the Partner Report in the eMS in the section "List of Expenditure" in a way that each certified expenditure per cost category and work package shall be entered in a separate field (fields can be added by clicking on "Add Real Cost"). The information shall be entered *in the Slovenian language* and amounts in EUR. Financial part of the form IS a mandatory annex to the Partner Report in the eMS. The Project Promoter shall upload it to the section "Attachments".

Submission of partner's report is described in section 3.1.6. The deadline for submitting the partner report for the Donor Project Partner is also 30 days after the end of the reporting period.

After the approval of the partner report of the Donor Project Partner by the Programme Operator, the Project Promoter includes it in the joint project report in the same way as partner reports of the Slovenian project partners (next section).

3.2 Joint project report

After the control unit reviews the partner reports and issues certificates and the Programme Operator reviews the partner reports of the Donor Project Partner(s), the Project Promoter creates a joint project report.

To prepare a joint project report, the Project Promoter selects the role "NProj/Lp" (Project Promoter) in the drop-down menu. Each Project Promoter can choose from two roles, "Pp" (project partner) if preparing own partner reports, or "NProj/Lp" if preparing a joint project report. The "NProj/Lp" role allows the Project Promoter to see all partner reports and to create and submit a joint project report.

Figure 15a: Selecting a role and creating a joint project report

Poročila o projektu/Project Reports

Poročilo/Report	Začetek poročila/Report Start	Konec poročila/Report End	Stanje/State	Datum predložitve poročila o projektu/Date Of Project Report Submission	Date Of Project Report First Submission (EGP)	Total Expense Submitted To JS
Obdobje poročanja/Period 1	10.09.2019	30.11.2019				
Obdobje poročanja/Period 2	01.12.2019	31.01.2020				
Obdobje poročanja/Period 3	01.02.2020	31.03.2020				

To create a new joint project report, click on "Create Report for" and select the period below the table listing all joint project reports. The system then redirects the user to the joint project report corresponding to the specific reporting period.

The joint project report consists of the financial and substantive part. The system automatically prepares the financial segment on the basis of available CU certificates,

included in the joint project report by the Project Promoter. Project report certificates are included in the joint project report by clicking on the box (circled in Figure 14b) in the report row (which the user wants to include in the joint project report) in the column “Include in Project Finance Report” of the table “List of Partner Flc Certificates” so that a tick appears in the box.

Figure 16b: Inclusion of verified project reports in the joint project report

ture Certified By F L C	Vključeno v finančno poročilo projekta/Include In Project Finance Report	Izdatki partnerja skupaj vključeni
€ 0,00	<input checked="" type="checkbox"/>	
€ 0,00	<input type="checkbox"/>	

Izvozi kot Xls/Export As Xls

The tick should appear in the boxes of all rows of certified partner reports (by Slovenian project partners and Donor Project Partners) that the user wants to include in the joint project report. By clicking on the box with a tick, the tick is deleted from the box. If the column “Include in Project Finance Report” does not appear in the table “List of Partner Flc Certificates”, move the table slider (marked with an arrow pointing to the left in Figure 14b) to the right until the column is displayed. If you forget to include (tick) the certified partner reports for the current joint project report, you can include them in the joint partner report for the next (future) period.

The content of the joint project report is filled in manually by the Project Promoter. It is also possible to attach annexes to the joint project report. Some parts of the joint project report depend on the approved application form (e.g. work packages available).

3.2.1 Section “Report”

The section “Report” (Figure 15a) covers activities carried out during the reporting period. It contains general descriptions of activities and reporting by work packages. This section begins by describing the activities (“Highlights of Main Achievements”) of the relevant reporting period and including CU certificates for project partners (Figure 14b). The achievement of project specific objectives is reported and an overview of the project main outputs is presented (“Project Main Outputs Achievement”) (Figure 15b). This table is generated automatically on the basis of the data entered in the “Workpackages” section of the report.

Figure 17a: Section “Report”

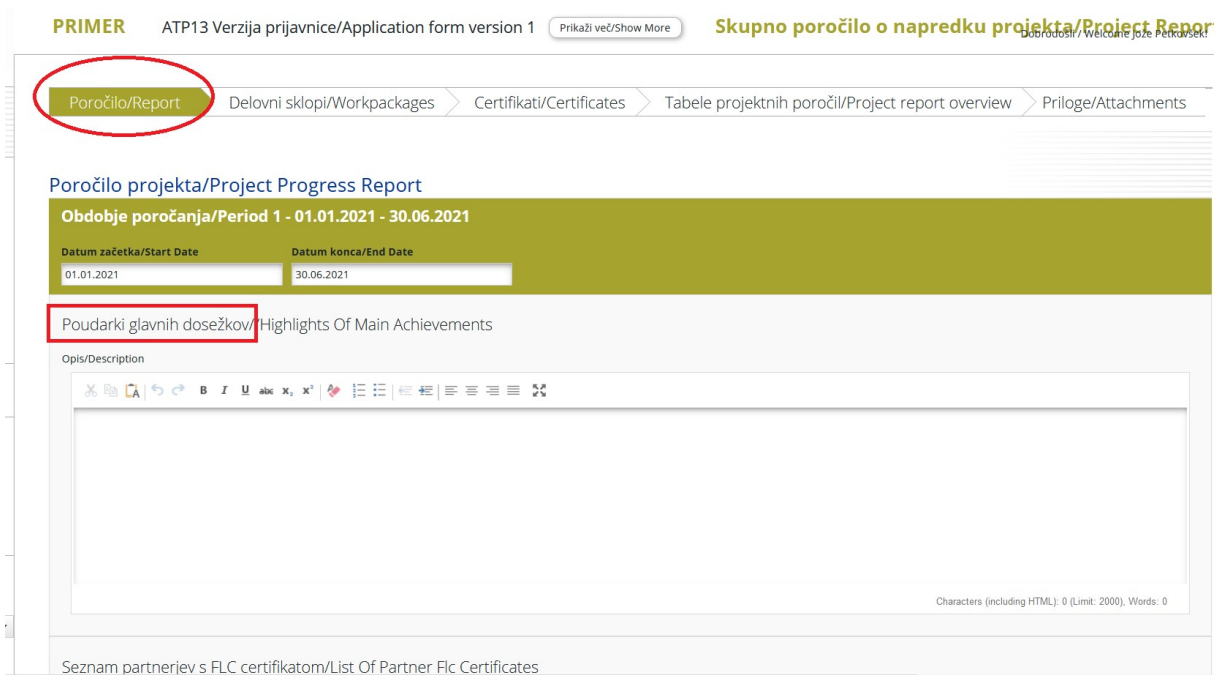

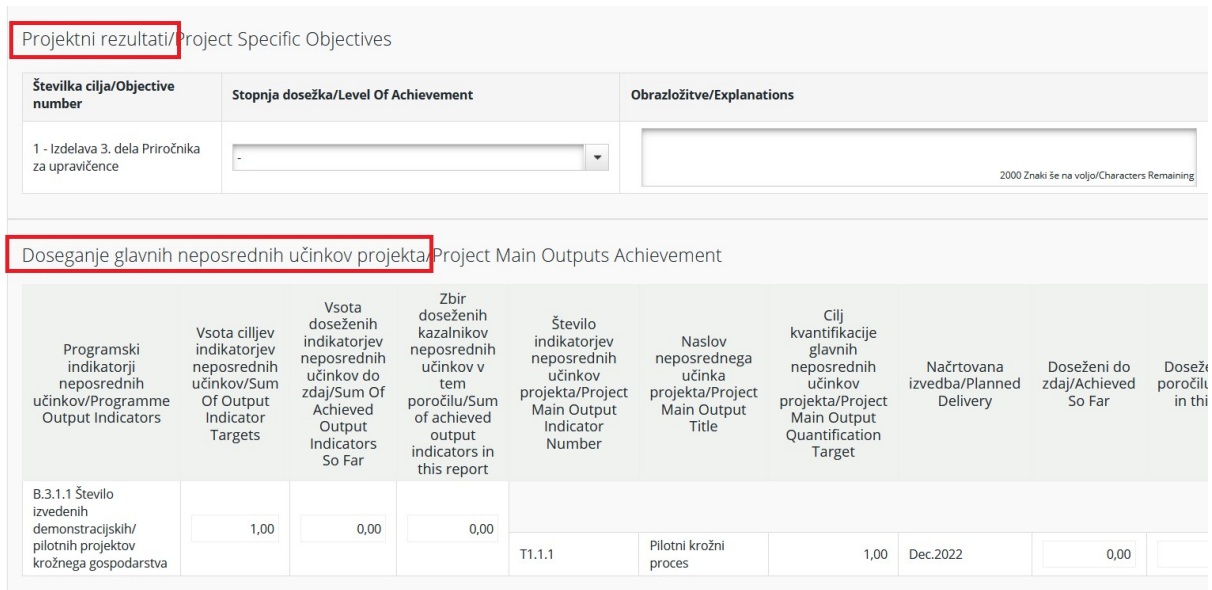

Figure 18b: Section “Project Specific Objectives” and “Project Main Outputs Achievement”

Reporting on the level of achievement under the section “Project Specific Objectives” is done by clicking on the triangle (circled in Figure 15c) and selecting one of the options for evaluating the level of achievement (marked in the square in Figure 15c).

Figure 19c: Reporting on the level of achievement under the section “Project Specific Objectives”

Doseganje glavnih neposrednih ciljev/Achievement

Next, quantitative data on reached persons/organisations of target groups in the current period should be entered, including data on found problems and solutions and self-assess the contribution to horizontal principles together with an explanation of the assessment in the (current) reporting period (Figure 16a).

Figure 20a: Reporting on the reached target groups, problems and solutions found and horizontal principles

Opišite in pojasnite probleme in odklone ter zamude pri delovnem načrtu, ki je predstavljen v prijavnici in ugotovljene rešitve/Please Describe And Justify Any Problems And Deviations Including Delays From The Work Plan Presented In The Application Form And The Solutions Found

2000 Znaki še na voljo/Characters Remaining

For each work package, the Project Promoter selects “Wp status” from the drop-down menu (Figure 18), describes the progress made during the reporting period and explains how the partners were involved and who did what, and describes and explains the problems of deviations and delays in view of the work plan set out in the application form, and the developed solutions.

The achievement of the indicators of project main outputs is assessed, the achieved values of the indicators are entered and the progress in terms of the activities carried out is assessed. Uploading proofs of achievement is part of reporting by work packages; this is done by clicking on the magnifying glass icon in the column “Attachments” and in the line project main outputs (Figure 19a).

Figure 24a: Reporting on the indicators of project main outputs, activities and achievements

Zahtevani znesek v izvorni valuti/Declared Amount In The Original Currency *	81,00		
Zahtevani znesek v EUR/Declared amount in Eur	81,00		
Izdatki izven programskega območja(izven SLO in donatorskih držav)/ (Expenditure Outside (The Union Part Of) The Programme Area?	<input type="checkbox"/>		
Preverila KE/Verified By Fic	<input checked="" type="checkbox"/>	Komentar KE/Comment Fic (pp,flc,js,ma,ca,ba)	
Razlika KE/Difference Fic	€ 0,00		

The Project Promoter can reduce the project partner's expenditure by selecting (clicking on the invoice line) in the invoice table to open the invoice information window (Figure 21). The Project Promoter can then determine the difference in the green field and reduce the certified amount of the invoice. Values previously entered by the project partner and the control unit (budget, work package, internal reference number, invoice number, invoice date, payment date, currency, VAT) can no longer be changed.

3.2.4 Section "Project report overview"

Figure 28: Section "Project report overview"

Poročilo/Report	Delovni sklopi/Workpackages	Certifikati/Certificates	Tabele projektnih poročil/Project report overview
Priloge/Attachments	Priloge NProg/Attachments J T S	Dokumenti/Documents	

The user can choose from numerous summary tables included in the joint project report. The tables are updated before the report is submitted. All reductions of invoices made by the Project Promoter are immediately visible in the tables. The tables in the joint project report follow the same logic as the tables in the partner report, taking into account all CU certificates included in the joint project report.

Remember that the values (and name) in the column "Currently in Report" change with each change of the status of the report.

3.2.6 Submitting a joint project report

After entering all the data and information, the joint project report is checked by clicking on “Check Saved Report” (Figure 24). If the joint project report is not filled in correctly, a warning appears, but be aware: the system does not point out possible deficient content or incorrect numerical entries, but only technical irregularities. Proper completion of the report is thus still entirely the responsibility of the Project Promoter. When the joint project report is completed, a new “Submit Report” button appears (Figure 25). The report is submitted by clicking on this button.

Figure 32: Checking the saved report

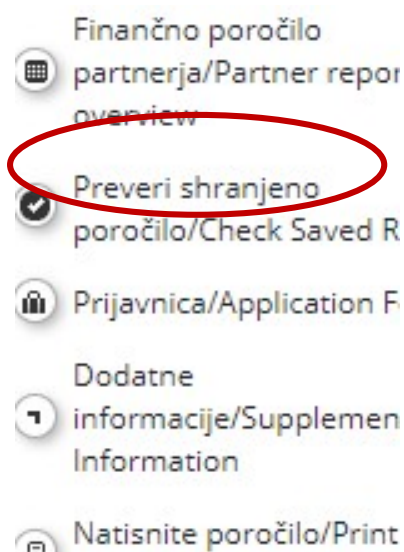

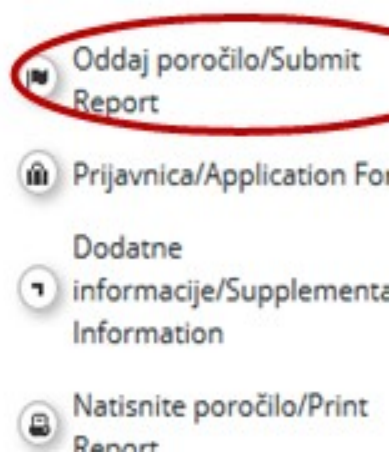

Figure 33: Submitting the report

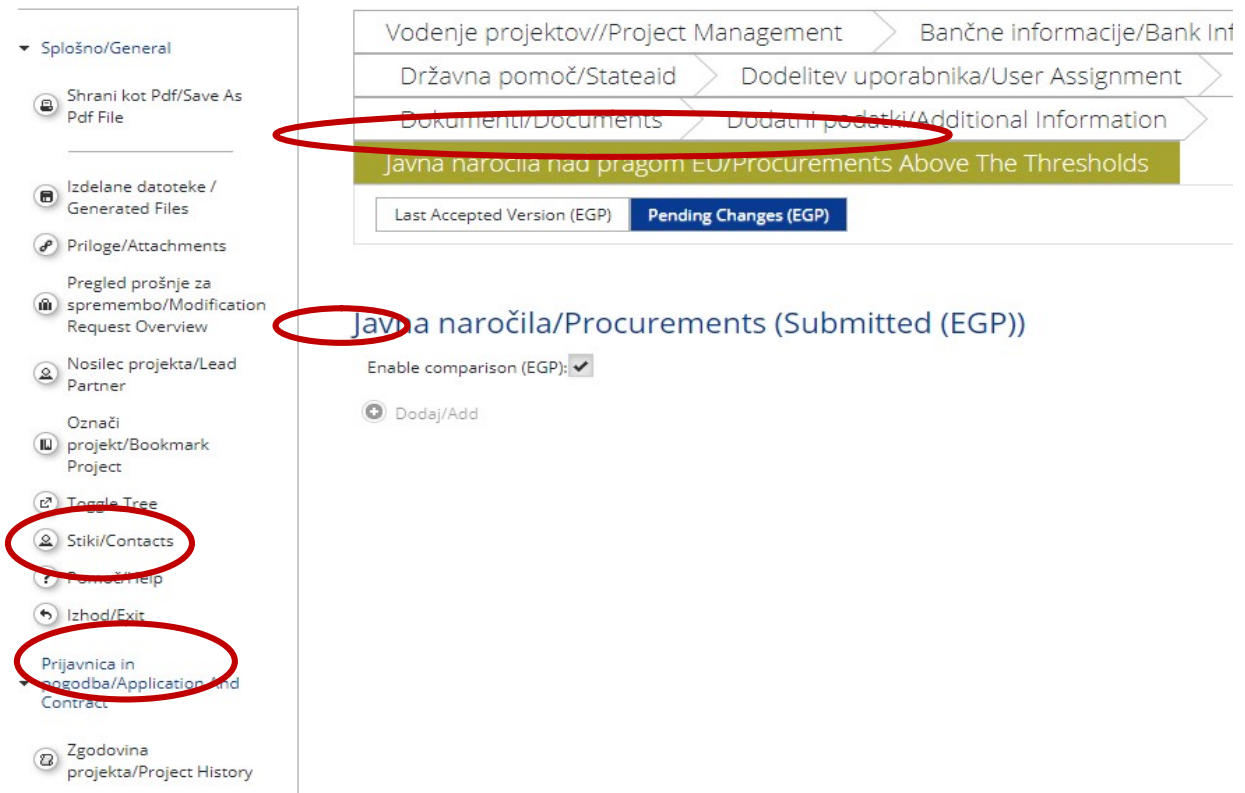

Once the joint project report is submitted, the Project Promoter can see it but can no longer make changes. A new joint project report can only be created after the previous report has been submitted.

3.3 Reporting on procurements above the EU threshold

If one of the project partners awards a public contract above the EU threshold (above the threshold value) set out in the act governing public procurement, the relevant project partner should inform the Project Promoter. The Project Promoter enters the information in the eMS under “Supplementary Information” in the section “Procurements Above the Thresholds” (Figure 29).

Figure 34: Supplementary information – section “Procurements Above the Thresholds”

The Project Promoter clicks on “Add” and a new, empty window appears (Figure 30).

The Project Promoter selects “Procurement Partner” from the drop-down menu (marked red in Figure 30) and fills in all other fields, namely “Contract Type”, “Contract Amount”, “Eligible

“Expenditure Incurred and Paid Based on Contract”, “Procurement Procedure Used”, “Name of Unique Identifier of the Contractor” and “Comment”.

By clicking on “Ad” the Project Promoter has the option of adding a new “Procurement” (marked blue in Figure 30).

By clicking on “Upload” the Project Promoter has the option of linking the invoice with the procurement with additional information (marked green in Figure 30).

4 Modification of the project

During implementation the project may be modified as presented in Part 2 of the Guide for Beneficiaries. The Project Promoter fills out and submits the modification request to the eMS. The modification should be clearly described and justified, including the reasons and impacts of the modification. Technical support for the modification shall be provided by the contract manager.

When the Project Promoter submits the modification request, the contract manager reviews the submitted request and carries out decision-making procedures according to the type of project modification. If the request to modify the project is granted, the contract manager shall give permission to the Project Promoter to update the relevant parts of the application form. If additional supporting documents are required for the requested modification of the project, they shall be uploaded to the eMS as annexes to the updated application form.

Contract manager reviews the modifications to the application form and, if necessary, requests that the Project Promoter provides additional explanations and information.

Based on the final submitted and revised application form, the contract manager via the eMS informs the Project Promoter about the final decision regarding the requested project modification.

4.1 Modifications of the project in the eMS

The Project Promoter accesses the modification by selecting the relevant project, where the pop-up window “Partner Reports” appears, and clicks on “Project” again (marked red in Figure 31).

Figure 36: Accessing modification request

The screenshot displays the eMS interface. On the left sidebar, the 'Projekt/Project' menu item is circled in red. The main content area shows a navigation bar with 'P1' and 'OB'. Below it is a dropdown menu labeled 'Izberi vlogo/Select Role' with 'Pp' selected. The main heading is 'Poročila partnerja/Partner Reports'. Underneath, it says '1 - Podjetje - P1'. A table with the following columns is visible:

Poročilo/Report	Začetek poročila/Report Start	Konec poročila/Report End	Stanje/State	Datum predložitve poročila/Date Of Partner Report Submission	Datum prve predložitve poročila/Date Of Partner Report First Submission
Obdobje poročanja/Period 1 10.09.2019 - 31.03.2020					
					Poročilo

The user then selects “Modification Request Overview” (marked red in Figure 32) in section “General” (marked blue in Figure 32).

Figure 37: Modification request

The screenshot shows the sidebar menu of the eMS. The 'Splošno/General' menu item is circled in blue. Below it, the 'Priloge/Attachments' menu item is circled in red. Other visible menu items include 'Shrani kot Pdf/Save As Pdf File', 'Izdelane datoteke / Generated Files', 'Priloge/Attachments', 'Prejeto prošnje za spremembo/Modification Request Overview', 'Nosilec projekta/Lead Partner', 'Označi projekt/Bookmark Project', 'Toggle Tree', 'Stiki/Contacts', and 'Pomoč/Help'.

Then a window appears (Figure 33a) where the Project Promoter clicks on “Request Modification” which opens the pane with the application change request. This window contains information about potential previous modification requests.

Figure 38a: Window “Modification Request Details”

Podrobno o prošnji za spremembo/Modification Request Details- Projekt/Project Testni pro

Številka spremembe/Modification number	Odpri podrobnosti spremembe/Open modification details	Prošnja za spremembo		
		Prošnje za spremembo (datum)/Modification request (date)	Prošnjo za spremembo zahteva/Modification requested by	Vrsta spremembe of modifica
No records found.				

The Project Promoter enters information on the intended modification in the application change request (Figure 33b). After saving the entry, the contract manager is informed about the modification. The contract manager can either approve the request and opens the application form so that the changes can be made by the Project Promoter, or reject the request. The Project Promoter can submit the request during the implementation of the project.

- the Project Promoter submits the request → the contract manager approves the request and allows the entry of changes → the Project Promoter changes the application form → approval of the entered changes → a new version of the application form is created, or
- the Project Promoter submits the request → the contract manager approves the request and allows the entry of changes → the Project Promoter changes the application form → the contract manager requests corrections or additional changes → the Project Promoter changes the application form → approval of the entered changes → a new version of the application form is created, or
- the Project Promoter submits the request → the contract manager approves the request and allows the entry of changes → the Project Promoter changes the application form → the contract manager rejects the changes → the application form remains unchanged (new version of the application form is not created) or
- the Project Promoter submits the request → the contract manager rejects the request → the application form remains unchanged (a new version of the application form is not created).

5 Exchange rate

Pursuant to the Regulations the amounts shall be converted into euro using the monthly accounting exchange rate of the European Commission⁴ in the month during which the expenditure was registered in the accounts of the beneficiary.

The Programme Operator is not responsible for losses resulting from exchange rate fluctuations.

6 Payment method

The Financial Mechanisms grants and the matching national contribution shall be paid to the Project Promoter in one of the following ways:

- as advance payments, or
- as reimbursement of eligible expenditure.

ADVANCE PAYMENTS

In accordance with the Budget Execution Act of the Republic of Slovenia, the Project Promoter who is a person of private or public law and is established and acts as an association, private or public institute or institution, is eligible to advance payment in the amount of up to 30% of the value of the planned payments under the Financial Mechanisms and the matching national contribution for the project. If the amount of the advance payment is above EUR 100,000.00, the Programme Operator shall obtain, prior to signing the Project Contract with the Project Promoter, consent of the Minister responsible for finance.

After signing the Project Contract, the Project Promoter sends a request for advance payment in the form of an e-invoice to the MCRD financial service. The Project Promoter

⁴ Monthly accounting exchange rate of the European Commission: https://ec.europa.eu/info/funding-tenders/how-eu-funding-works/information-contractors-and-beneficiaries/exchange-rate-infoeuro_en

receives the funds within 30 days of signing the Project Contract, makes payment to other project partners and sends proof of this to the contract manager.

The Project Promoter, who is a direct user of the state budget or is not a person in accordance with the first paragraph of this part (Advance Payments), is not eligible to advance payment. Payments are made only in the form of reimbursement of eligible expenditures.

REIMBURSEMENT

The Project Promoter, who is not a direct user of the state budget, submits a request for reimbursement of eligible expenditure (reduced by any potential advance payments, etc.) in the form of an e-invoice after receiving the notification of approval of the joint project report. Interim payments shall be paid no later than 30 days after the receipt of the e-invoice. If the Project Promoter is eligible to advance payment, the amount of advance payment is offset with the amount of reimbursement request before any additional payments are made. After receiving the funds, the Project Promoter makes payment to other project partners.

The Project Promoter, who is a direct user of the state budget, does not submit a request for reimbursement of eligible expenditure in the form of an e-invoice after receiving the notification of approval of the joint project report as the funds for the relevant Project Promoter are provided in the budget of the Republic of Slovenia through commitment appropriations on budget items of the Financial Mechanisms and the matching national contribution.

The advance payments and reimbursements of eligible expenditure are paid to the Project Promoter until the total amount of payments reaches 80% of total estimated amount of payments from the Norwegian Financial Mechanism or EEA Financial Mechanism and national co-financing funds within the project. The last reimbursement of eligible expenditure is executed after the final project report has been approved. If the amount of all previously executed payments exceeds the final amount of all eligible expenditures in line with the project grant rate, the Project Promoter shall return the exceeding amount to the Programme Operator within the deadline set by the programme Operator.
